

Strobe light BLS

Optical signalling device for indoor and outdoor applications

Overview

The BLS Strobe Light is an optical signalling device for universal use for example as continuous, warning or alarm strobe light. The ribbed cap is available in 5 different colours and achieves an extremely wide light dispersion.

The strobe light is available with a flash energy of 5 or 15 joule for continuous operation.

The plastic housing is made of impact-resistant thermoplastic and the cap consists of impact-resistant plexiglass. The cable is led into the housing through a self-sealing grommet M16 x 1.5. The arrangement of the fastening bar allows for a surface or flush-mounted wiring.

Features

- Compensation valve to prevent condensation water
- Flash energy 5 Joule, 15 Joule
- Flash frequency 60/min.
- Continuous operation
